Army Corps announces weekend releases back on

PHILADELPHIA (Sep. 28, 2007): The U.S. Army Corps of Engineers today announced that this weekend's whitewater releases from the F.E. Walter dam will occur as previously scheduled, 900 cfs on Saturday and Sunday..

The Corps announced yesterday a tentative cancellation of the release in an effort to aid in Carbon County's cleanup of an intermittent oil flow in the Lehigh River near Jim Thorpe. The county has determined that a whitewater release will not impede their efforts.
